The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 9-12, 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Forrest et al., U.S. Publication No. 2003/0117068 A1.

Forrest anticipates a method to fabricate an organic electronic and optoelectronic device, p. 1, ¶ 3, comprising:

Preparing, in fig. 2, layer 181, a first part with at least a layer of a first organic material containing a first polymerisable group, lower part of one of the layers of 181,

Preparing a second part with at least a layer of a second organic material containing a second polymerisable group, upper part of one of the layers of 181, Bonding said first part to said second part under an environment with controlled parameters, wherein said bonding of said first part and said second part is achieved by cross-linking between said first polymerisable group and said second Polymerisable groups, p. 4, ¶ 47;

electronic device as defined in Claim 9 wherein said first polymerisable group is the same as said second polymerisable group, listed in p. 4, \P 47;

limitations from claim 11, a method to fabricate an organic electronic and optoelectronic device as defined in Claim 9, wherein said first polymerisable group is different from said second polymerisable group, from "combinations thereof" of the polymers listed in p. 4, ¶ 47;

limitations from claim 12, a method to fabricate an organic electronic and optoelectronic device as defined in Claim 9, wherein said first polymerisable group and said second polymerisable group are selected from a group of alkyl, acrylate, epoxy, vinyl, vinyl ether, oxethane, acrylnitrile, urethane, amino, hydroxyl, halide, isothiocynate, isocynate, nitrile, or a mixture of at least two of the above: acrylate, listed in p. 4, ¶ 47;

limitations from claim 14, A method to a fabricate an organic electronic and optoelectronic device as defined in Claim 9, wherein said controlled parameters of said environment include heating, electron beam radiation or light lamination: heating, p. 4, ¶ 47.

Response to Arguments

Applicant's arguments with respect to claims 9-12, 14 have been considered but are most in view of the new ground(s) of rejection.

Application/Control Number: 10/617,413

Art Unit: 2823

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William M. Brewster whose telephone number is 571-272-1854. The examiner can normally be reached on Full Time.
